

# Chompers gets Braces!

  
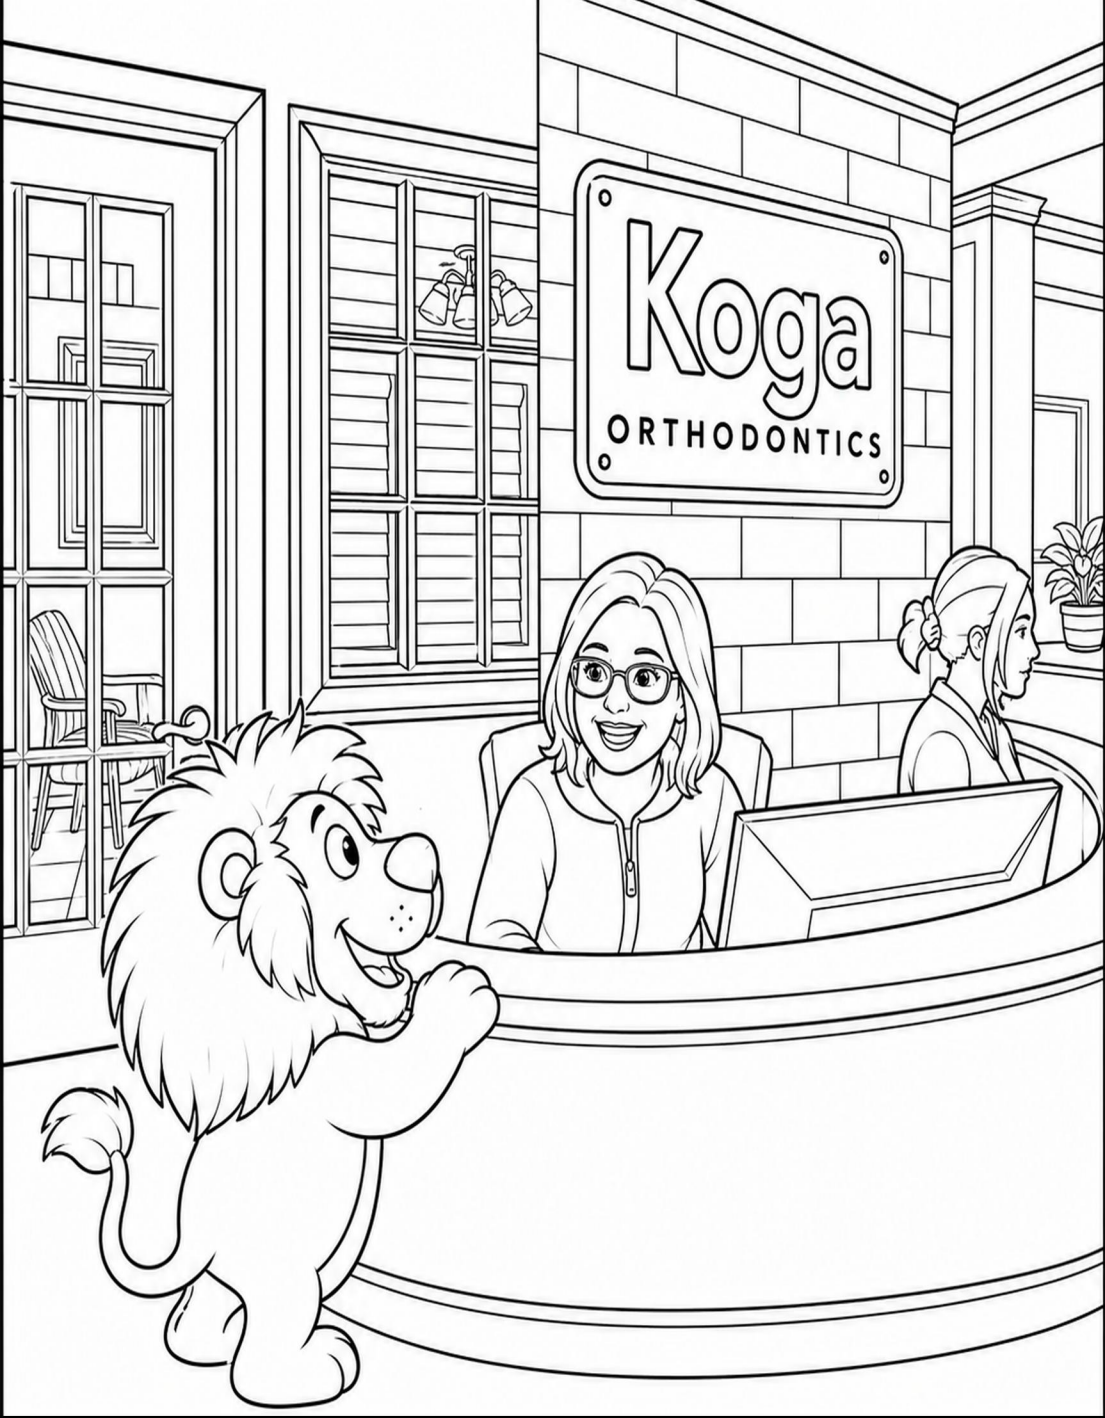

**Koga Orthodontics**  
YOUR SMILE. OUR PASSION.

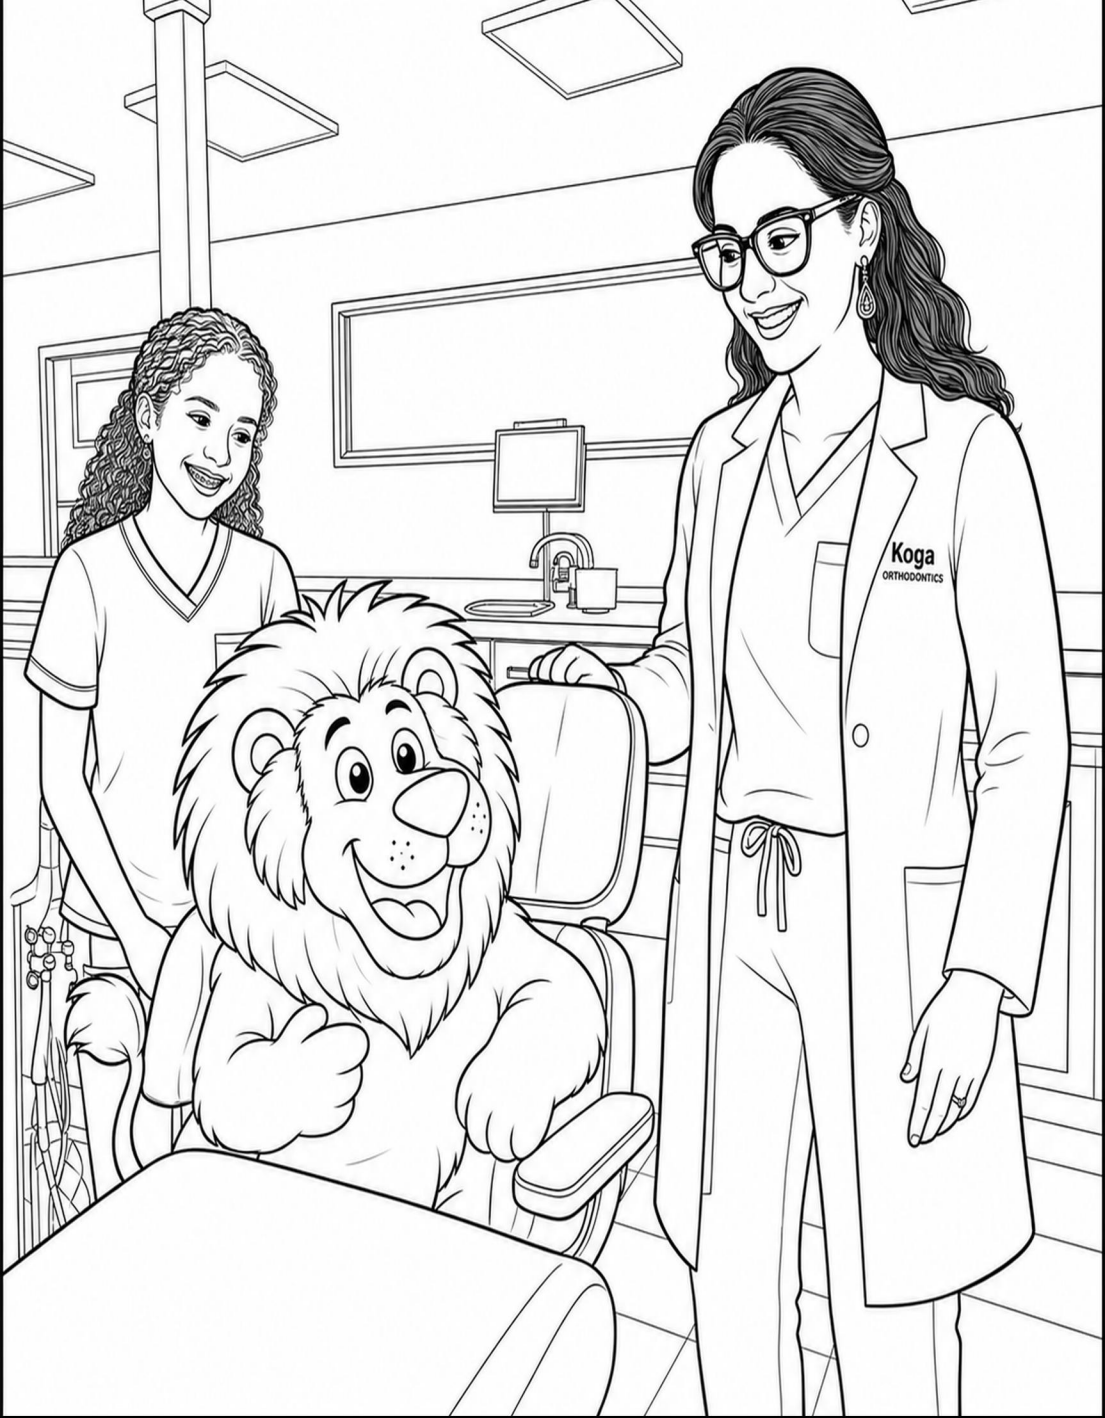

Chompers was standing at school with his friends and could not help but notice their smiles. Their teeth were so straight and their braces were so colorful! He asked his pals how he could have a smile like that. They replied, "Koga Orthodontics of course!"

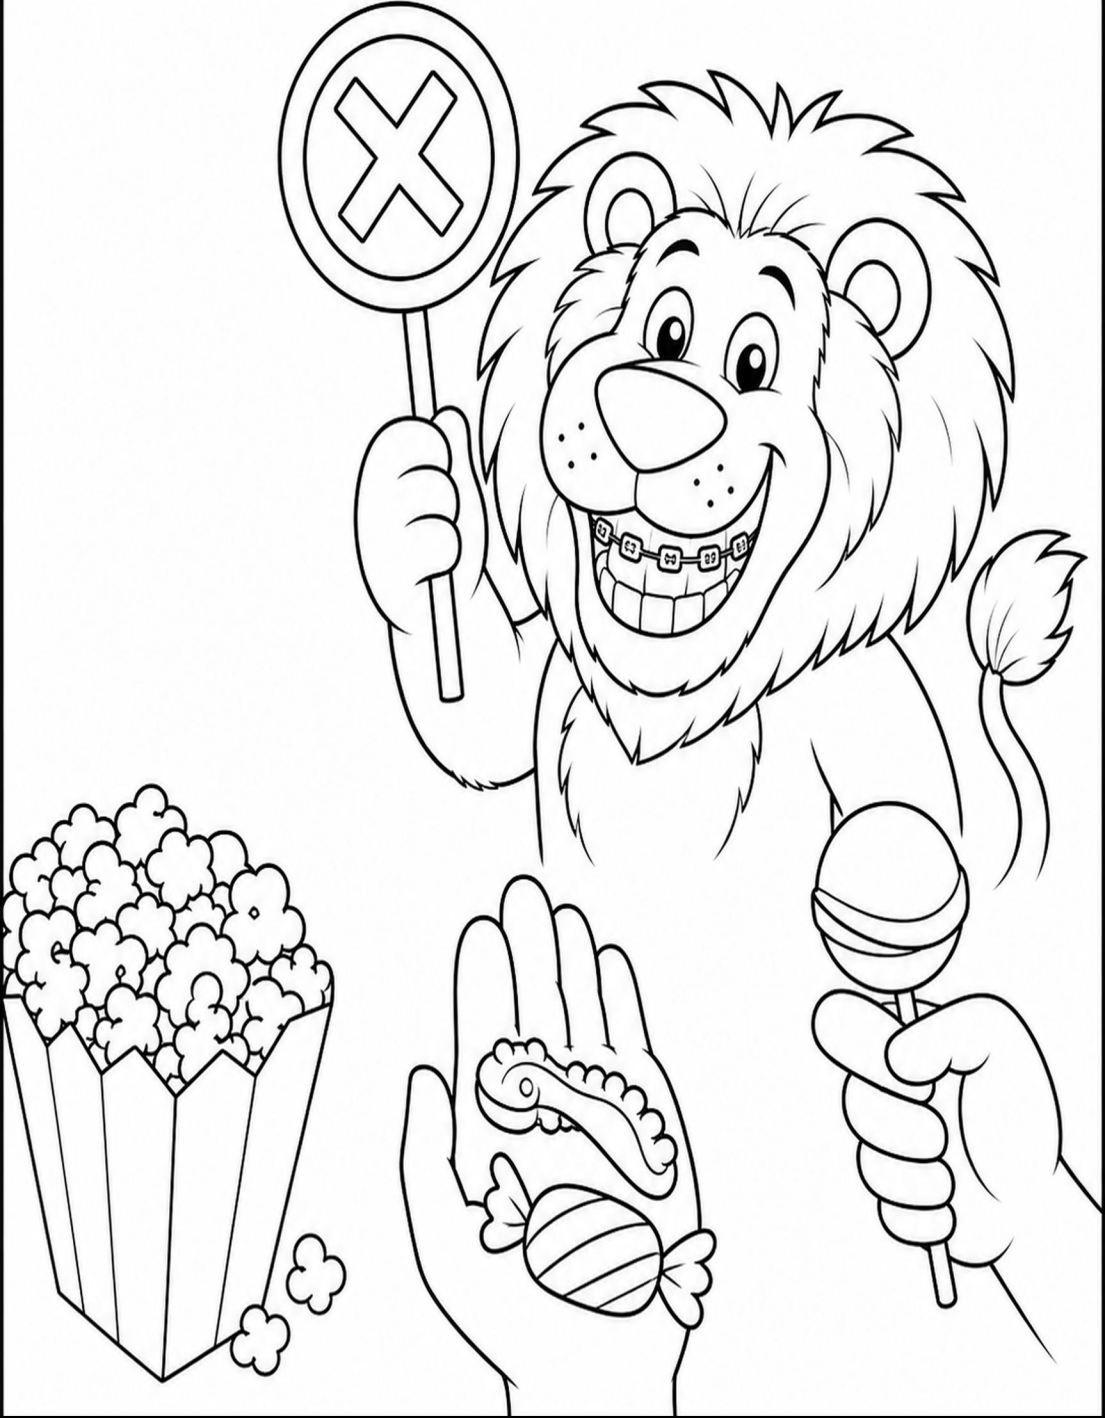

That was all it took. Chompers knew he wanted to have a smile like that too!

The next day Chompers goes in for his first appointment to pick out his braces

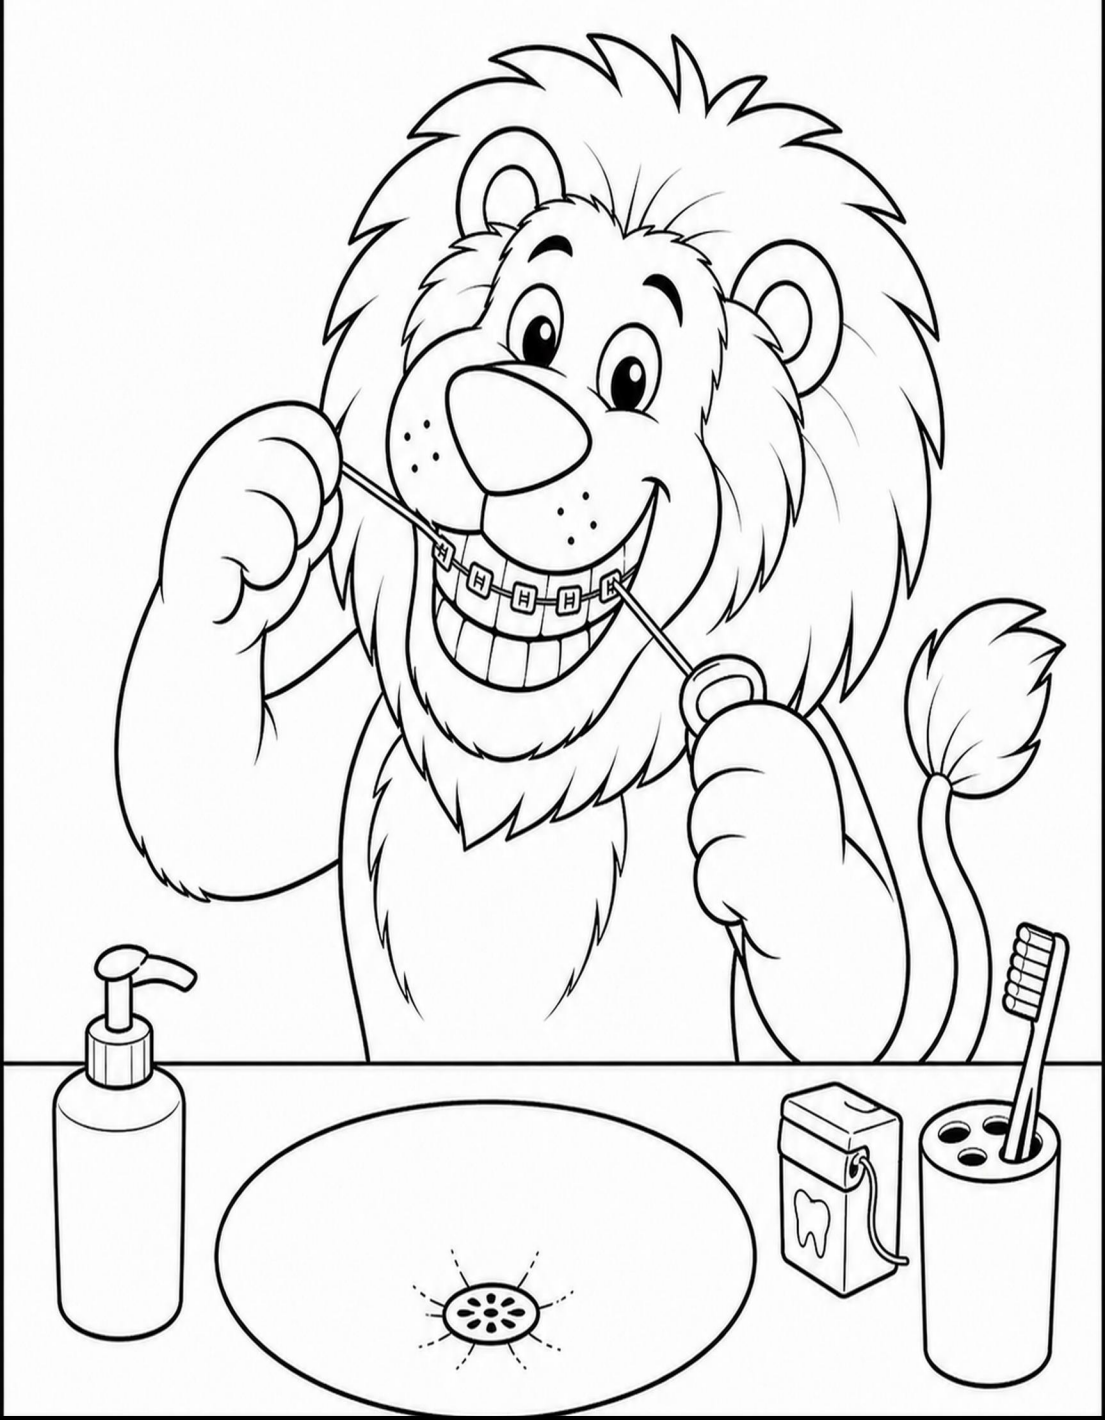

Chompers met with Dr. Koga to talk about his treatment and pick out his cool colors!

One thing to remember with braces is that you have to avoid sticky, crunchy, or chewy foods.

It's always a great idea to brush your teeth after every meal!

Don't forget to floss those brackets too!

Thanks to our amazing team, Chompers has the smile he's always wanted!

## Problems To Watch For In Children Age 5 to 8

The American Association of Orthodontists recommends your child's first orthodontic check-up by age 7.

Early orthodontic visits help spot bite problems while smiles are still growing. If you notice spacing, crowding, or bite changes, we are happy to take a look.
